

Tailored Services around Ground Conveyors

Chemion Logistik at the 2010 LogiMAT Trade Show

A tiller-controlled and a rider-seated vehicle as well as an interesting portfolio of services around ground conveyors – that is what Chemion Logistik is going to display at the company's LogiMAT **Booth No 341** in **Hall 7**, March 2-4, 2010. As a logistics service provider with an emphasis on dangerous goods handling Chemion operates an equipment pool including over 2,000 ground conveyors, 400 of which are explosion-proof forklifts. From among these vehicles Chemion selected, by way of example, the rider-seated RX20-16Ex as well as the tiller-controlled D416ex forklift for display at the LogiMAT trade show because both systems are widely used for warehouse, production and distribution logistics in the chemical industry. Chemion has organized its service offerings in the field of ground conveyors according to the motto "always the right vehicle in the right place at the right time": It allows customers who wish to obtain services for their ground conveyor fleet to freely combine services and select the respective volume of services. Chemion makes equipment available on long-term or short-term leases (1 day to 12 months), as required.

Chemion Logistik GmbH

As a complete supplier Chemion Logistik GmbH covers the whole spectrum of logistical services in the chemical industry and associated sectors. As a specialist in dealing with hazardous materials and dangerous substances Chemion makes equipment and infrastructure available and offers warehouse, handling, transport and value-added services, management, operating units related to production logistics as well as training services. This makes the company a particularly interesting partner for companies from the chemical industry and associated sectors. Yet also companies from other sectors count among Chemion's customers and benefit from the many years of experience acquired by the company's approx. 1,070 employees. The company has subsidiaries in Leverkusen, Dormagen, Krefeld and Duisburg. In 2009 Chemion generated a turnover of 114 million Euros.
